Protection of High-Risk Installations

3D Printing

About Groupe Gorgé

Founded in 1990, Groupe Gorgé is an independent group that specializes in high-tech industries. Today, the Group is active in the fields of security and protection in extreme environments, as well as in the 3D printing sector. In its more than twenty-five year history, Groupe Gorgé has always developed and driven the latest technological and industrial innovations.

Smart Safety Systems:

Developing complete, innovative technological solutions for complex missions in hostile and confined environments.

Protection of High-Risk Installations:

Protecting people and ensuring the active and passive protection of installations for energy markets and industrial and tertiary sectors in France. Ensuring the maintenance of these protection systems.

3D Printing:

Enabling major industry players to find new routes to successful innovation and production processes by providing 3D printers, premium material, software and 3D printed parts.

In 2017, the Group reported revenue of €276.7 million. It is backed by 2,000 employees and operations in over ten countries.

Naval Group and ECA Group offer an innovative mine hunting solution to Belgium and the Netherlands

Naval Group and ECA Group, a Groupe Gorgé company, recently established a technological and commercial partnership in the field of unmanned mine warfare. The first practical application was completed as part of the response to the consultation launched by Belgium for a Belgian-Dutch cooperation for the supply of 12 mine hunters.

Mine hunting practices are being revolutionized through the massive use of unmanned systems operating on the surface, in the air and in the sea. This paradigm shift will lead to transformations that will affect naval forces as a whole. The future mine warfare capability should be established, and then develop, based on threats and technological progress in the areas of staff, equipment, interoperability and organization, concepts and doctrine, infrastructures and logistics.

In preparation for this near future, Naval Group and ECA Group recently established a technological and commercial partnership in unmanned mine warfare, aimed at developing and promoting an offer of military mine countermeasure vessels (MCM) integrating drones, sonars, mine sweeps and remotely operated systems.

As partners in a consortium formed for this call for tender, Naval Group and ECA Group are offering an innovative solution for robotic mine warfare, which is fully integrated on board an MCM military vessel. The two partners have combined all their most effective and robust sea-proven solutions, already in mission with other clients, to provide the Belgian and Dutch naval forces with a comprehensive, integrated and cyber-secure solution at a cost-effective ownership cost. In addition to these solutions, the two partners have formed a project management team based in Belgium, which will rely on various local partners, with whom alliances have already been established.

This partnership brings together the skills of Naval Group, European leader in naval defense, responsible for designing, supplying and maintaining military vessels carrying drones, with those of ECA Group, a robotics specialized Group with expertise in mine warfare developed over several decades, responsible for designing and providing resources that may be launched onto minefields (drones, sonars, etc.).

This extension of a collaboration born 60 years ago aims to integrate UMISTM unmanned systems on board Naval Group vessels to offer launching and recovery systems guaranteeing a high level of availability of these resources at sea, and to integrate them into the vessel's warfare system to manage their mission from end to end.

About Naval Group

Naval Group is the European leader in naval defense. A high-tech company, Naval Group uses its exceptional know-how, unique industrial resources and ability to establish innovative strategic partnerships to meet its clients' requirements. The Group designs, produces and maintains submarines and surface vessels. It also provides services for naval shipyards and bases. Always at the forefront of innovation, in recent years the company has led various developments regarding drones, their integration and their supervision on vessels. Committed to corporate social responsibility challenges, Naval Group is a member of the United Nations Global Compact. In 2017, the Group generated revenue of €3.7 billion and had 13,429 employees.

About ECA Group

ECA Group is an expert in naval drones and unmanned systems and one of the global leaders in this sector for the last 50 years. Moreover, the beginnings of ECA Group in naval robotics took place alongside Naval Group: ECA Group had been tasked with creating a free submarine model at the end of the 60s, which was implemented by Naval Group in St-Tropez. Following that, Naval Group and ECA Group collaborated on developing the first MIDS (Mine Identification and Destruction System) in the world, the PAP guided self-propelled mine clearance ROV. Still used by the French Navy, this robot has been sold in several hundred copies across more than 30 countries.

Today, ECA Group masters underwater drones just as well as surface or air drones, enabling it to offer a very wide and complete range of UMISTM drone systems suited to all types and sizes of military vessels.

Disclaimer

GROUPE GORGE press releases may contain forward-looking statements regarding GROUPE GORGE's targets. These forward-looking statements reflect GROUPE GORGE's current expectations. Such forward-looking statements and targets depend on known and unknown risks, uncertainties and other factors that could cause actual results, performance or events to differ materially from those anticipated herein. The risks and uncertainties that could affect the Group's future ability to achieve its targets include, in addition to those indicated in the press release: the strength of competition; the development of markets in which the Group operates and notably the 3D printing division; currency fluctuations; obtaining the export authorizations that may be required for certain activities; control of costs and expenses; changes in tax legislation, laws, regulations or their enforcement; our ability to successfully keep pace with technological advances; our ability to attract and retain qualified personnel and key staff; the evolution, interpretation and uniform application and enforcement of International Financial Reporting Standards (IFRS), according to which we prepare our financial statements; manufacturing and supply chain bottlenecks; the performance of our business partners (subcontractors, agents, suppliers, etc.). Some of these risk factors are set forth and detailed in our Document de Référence (Registration Document including the annual financial report filed with the French Autorité des Marchés Financiers), available on our website www.groupe-gorge.com. This list of risks, uncertainties and other factors is not limitative. Other unanticipated, unknown or unforeseeable factors, such as changes in the economic situation or financial markets, could also have a material adverse effect on our targets.

This press release and the information it contains do not constitute an offer to sell or to subscribe, or a solicitation to purchase or subscribe shares or securities in GROUPE GORGE or in its listed subsidiaries in any country whatsoever.
